

<b>SUMMARY "RASFF-REVIEW 2014" – NR 2</b>
---

The overview of all notices relating to Animal feed, issued by the European RASFF (*Rapid Alert System for Food and Feed*), has been updated on July 31, 2014.

The 2014 overview is structured in the same way as the one in 2013.

From the title of the various columns, the user may select and sort on the basis of any information that may be of interest to him (e.g. all notices considered to be "alert", all notices relating to a group of products and all notices concerning the same code of feed materials, etc. The column «Remarks» has, where applicable, been used to complete the information in the RASFF notice.

By making use of the overview, you will be able to evaluate and possibly define your hazard analysis.

You will find the necessary explanation, as well as an overview of our page, dedicated to this topic, on our website dedicated to this topic: <http://www.ovocom.be/RASFF.aspx?&lang=en>.
