

UPDATE INTERNATIONAL DATABASE TO TRANSPORT ANIMAL FEED (IDTF)

Update International Database Transport for Feed (IDTF): Changes for Qualimat and QS, reduction of the list of differences

The International Committee for Road Transport (GMP+ International, OVOCOM, QS, Qualimat, GTP, AIC and Gafta) has reduced the list of differences.

The list contains all products for which different cleaning regimes are valid for the participants of the ICRT-members. The reduction is the result of changed cleaning regimes for the standards Qualimat and QS. Please find below a list of the products for which the cleaning regimes were changed and the common cleaning regimes for these products.

The list of differences which can be found under www.icrt-idtf.com has been updated due to these changes.

Changes for Qualimat

IDTF N°	Product name	Previous cleaning regime	New common cleaning regime
20060	Aquatic invertebrates, alive	Forbidden	D
20061	Fish, alive	Forbidden	D
30344	Pollen	B	C
30347	Collagen, if not dry	D	C
30351	Eggs, from a (EC) 1069/2009 registered company	D	C
30352	Albumen, if from a (EC) 1069/2009 or (EC) 853/2004 registered company, if not dry	D	C
30353	Fish solubles, from a (EC) 1069/2009 registered company, if not dry	D	C
30354	Fish protein, hydrolysed, if not dry	D	C
30355	Krill protein concentrate, hydrolysed, from a (EC) 1069/2009 registered company, if not dry	D	C
30358	Moist/wet products from the bakery and pasta industry, without meat/fish	D	C
30359	Moist/wet products from the pastry industry, without meat/fish	D	C
30360	Products from the confectionery industry without gelatine of ruminants	C	B
30361	Moist/wet Products and by-products from the savoury snacks industry without meat/fish	D	C
30385	Gelatine of non-ruminants, if not dry	D	C

--	--	--	--

Changes for QS

IDTF number	Product name	Previous cleaning regime	New common cleaning regime
10099	Terrestrial invertebrates, alive	D	forbidden
30072	Calcium hydroxide	B	A
30125	Bee wax (white and yellow), intended for technical purposes	D	C
30343	Animal fats of category 3, fully or partially derived from ruminants	forbidden	C

The above changes to the IDTF may be applied immediately and are binding 3 months after the publication date.

The ICRT will constantly work on the list of differences as it is the aim to keep the list as short as possible.

This allows companies to work with comparable requirements for the cleaning of load compartments within the different schemes.

Update International Database Transport for Feed Sector (IDTF) : modification of the IDTF N° 30390

The IDTF No. 30390 mentioned the Keramine ; it has been modified to describe the solutions of amino acids in general.

The cleaning regime Qualimat and QS has changed, from D to B. The new common cleaning regime is now fixed at B.

IDTF number	Product name	Previous cleaning regime (QS and Qualimat)	New common cleaning regime
30390	Former name : Keramine New name : Solution of free amino acids, from complete hydrolysis of poultry feathers	D	B

The above changes to the IDTF are applicable immediately and are binding.

Use only permitted with reference to source (OVOCOM).
