## OVOCOM & GMP+ renew their interchangeability agreement

The interchangeability agreement between OVOCOM and GMP+ International has recently been renewed. That way, the mutual recognition between the Standards OVOCOM (FCA Standard) and GMP+ International (GMP+ FSA Standard) continues.

The agreement, which is valid for four years is, is based on the commitment of both parties to foster the mutual cooperation.

Concretely, this agreement means that FCA certified companies may (continue) to purchase products or services from GMP+ International certified companies – conforming FCA Document BT-02 – en vice versa. The interchangeability is valid without an additional audit and without additional costs.

More info as regards the interchangeability with the European Code and with the other Standards can be found on [our website](#).
